

## Bottlebag Original

### BottleBag supports the plastic soup foundation

Five cents of each BottleBag goes to the Plastic Soup Foundation.

The PSF stimulates all possible and innovative solutions that contribute to tackling the plastic soup at the source. The plastic that ends up in the environment and ultimately in the ocean has, in their opinion, the greatest impact on the environment and measures must be taken for this. This includes reducing the amount of disposable plastic by consumers, the development of reducing the plastic footprint by companies and coming up with smart solutions for collecting plastic in natural water.

[www.plasticsoupfoundation.org](http://www.plasticsoupfoundation.org)

Each bag contains a custom made tag. On the tag the production process is explained. This tag is made of unlined eco white or brown cardboard.

Every Bottlebag comes in a pouch, attached to the inside when not folded. The Bottlebag is completely foldable and fits into the pouch perfectly, which makes it easy to take everywhere on a daily basis.

The Bottlebag has a woven sidelabel with our Bottlebag logo. This label is custom made, so it's possible to customize the colour and put a client's logo on it instead of the original logo.

The Bottlebags have double stitching inside and an extra piping around the stitching, which makes them firm and stronger than competitive bags; one bag can carry up to 10 kilograms. Tested by SGS.

We start with the recycling of the PET bottles, which would otherwise end on the garbage-dump

The caps and labels will be removed before shredding the bottles

After shredding, the material will be woven into a fiber

The fiber will be reformed to rolls of fabric

This way, the newly made products find their origin in PET bottles

## 4 different options
